

Data Migration with Cloud FastPath

Subject Line:

Data migration add-on is now available with Dropbox Business!

Migrate to Dropbox Business with the data migration tool

Dear [FIRST NAME],

We're pleased to announce that our *Cloud FastPath* data migration add-on is now available with Dropbox Business.

Expanded Opportunities

This solution provides you with a new opportunity to quickly migrate your files and associated permissions to Dropbox Business. The solution, built in partnership with Cloud FastPath, helps you get more customer data into Dropbox Business more easily, so you can decrease turnaround times, increase adoption, and drive engagement.

Solving Customer Challenges

With the recent increase in remote work, many organisations' file storage solutions are struggling. VPN requirements cause friction in accessing content, complex sharing permissions hinder collaboration, and content is scattered across platforms. The Cloud FastPath data migration add-on helps bring content into Dropbox, so teams can quickly access content without VPN, leverage intuitive sharing features, and centralise all of their content.

Learn More

To learn more about the Cloud FastPath data migration add-on and requirements for you, contact us at [EMAIL/WEBSITE] or visit the [WEBSITE/LANDING PAGE].

Happy selling!
